**Quick Release  
Coupling**  
with Anti-Vibration Lock  
10,000lb (4536kg) Ultimate Capacity

**The Drallim Group**  
*Leading innovators in technology and quality*

- This is a rugged, heavy-duty tensioner for use in all situations. At one end is a double-jaw claw-type connector, operated by a quarter turn of a knurled hand grip, which attaches to a securing ring or other suitable strongpoint. At the other end of the coupling is a chain, and after all the slack has been taken up, it is secured by means of a half-turn of the lock. Turning the built-in handwheel on the body of the coupling produces the required tension in the lashing. Quick release is effected by a quarter turn of the handgrip. The adjustment includes a vibration proof anti-backoff lock, applied automatically, disengaged by twisting the release sleeve.

## Specification

Part Number:	100CA27
Cargo Aids Designation:	Coupling Adjustable with Anti-Vibration lock
Ultimate Capacity:	10000lb (4536 kg)
Weight:	4.81lb (2.18 kg)

UK Patent No. 2307531
