Static Mixers

We offer a wide variety of static mixers, including square OptiMixers, Turbo Mixers or round Static Mixers. It is important to note, you should always use an OptiMixer or Turbo unless your application requires elements with a small diameter or long reach

How Mixers Work – Element Geometry

OptiMixer (Square)

Turbo Mixer (Square)

Static Mixer

Mixer Selection

Choose the higher number of elements if one of two things occur (please ask we are always happy to advise): -

- Material A & B are of very different viscosities.
- Material A & B are very wide in mix ratio (i.e. 4:1 or greater for certain fluids).

Fluid	# Of Mixer Elements	Material Viscosity	
		Viscosity	Mixer Element Diameter
Acrylic	8 - 10	Thin < 5,000 cps	2.4-6.4mm
Epoxy	15 - 24		
Polysulfide	24 - 32	Medium 5,000-50,000 cps	5.4-8.0mm
PU Foam	10 - 24		
Silicone	20 - 30	Thick > 50,000 cps	>9.3mm
Urethane	24 - 34		

Disposable Static Mixers Quick Reference	
Mixer	Cartridge Volume & type
OptiMixer-F	u-TAH (all), Coax 380ml, side x side 200-1500mL
Turbo Mixer-E	u-TAH (all), Coax 380ml, side x side 200-1500mL
Turbo Mixer-E ₂	u-TAH (all), Coax 380ml, side x side 200-1500mL
Turbo Mixer-E ₃	u-TAH (all), Coax 380ml, side x side 200-1500mL
Static Mixer-A	u-TAH (all), Coax 380ml, side x side 200-1500mL
Static Mixer-D	Side x Side 50mL

Type-A Static Mixers

The mixing nozzle of the Type A has a bell inlet which fits our valve manifolds and large volume cartridges that separately port the A and B materials directly into the mixer. Clean-up simply involves removing the mixer and wiping the manifold face clean. In the case of the cartridges, because of the divider fin, simply remove the mixer. Our one-piece Metal Jacket is recommended if working pressure inside the nozzle exceeds 150 psi (10 bar) (only used with meter mix valves or manifolds).

Element Diameter 4.8mm

Type-A₂ Quick Spray Mixer

The Type A₂ Quick Spray is a low-pressure air-assisted spray system for two-component coatings. This disposable static mixer is designed for use with conventional meter/mix equipment or with our two-component cartridge system. The reactive coating is mixed within the disposable static mixer. At the mixer outlet, air is introduced which atomizes the liquid stream. The degree of atomization can be adjusted by regulating the airflow rate. Since the reactive coating is contained completely within the mixer, clean-up is minimal.

Note the Type A₂ system also requires these Parts: -

- Air Cap Assembly #101091.
- Quick Connect Fitting #101092.

Element Diameter 9.30mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Element / Housing
101089	24	19.08	Bell	Tapered	PP/PP
101090	24	25.12	Bell	Tapered	PP/PP

All Type A Mixers can be used with: - u-TAH Universal Cartridges, 380mL Coaxial Cartridges, 200-1500mL Side x Side Cartridges & Meter-Mix Valves (Except A₂).

Type-A₃ Mixer

Identical to the Type-A Mixers, except the housing outlet is designed to work with the ProTip Mixer Accessory. The ProTip allows you to easily apply a ribbon of material.

Element Diameter 19.9mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Outlet Tip Orifice (mm)	Element / Housing
101093	18	17.68	Bell	ProTip	2.54	Acetyl/PP
101094	24	22.45	Bell	ProTip	2.54	Acetyl/PP

Element Diameter 9.30mm

101095	18	18.49	Bell	ProTip	3.05	Acetyl/PP
101096	24	23.24	Bell	ProTip	3.05	Acetyl/PP

Element Diameter 12.65mm

101097	18	23.06	Bell	ProTip	4.57	Acetyl/PP
101098	24	24.96	Bell	ProTip	4.57	Acetyl/PP

ProTip Mixer Accessory

Part #	Width (mm)	Material
101099	12.5	Polyethylene
101100	25.0	Polyethylene

The ProTip Mixer Accessory is designed to provide higher speed, increased control, and an easy and cost-efficient way to apply ribbons when applying two-component materials. The polyethylene ProTip easily snaps onto the Type-A₃ & Type B Static Mixers.

Type-B Static Mixer

Intended for high-flow rate meter mix applications, this series contains our largest disposable bell mixers: 19.9mm in diameter with either 16, 23, 32, 39 or 48 elements. The rugged nylon housing has an oversized bell inlet. The downstream outlet is designed with a 1/2" NPS male thread to attach extensions or other types of accessories.

Element Diameter 19.9mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Outlet Tip Orifice (mm)	Element / Housing
100879	16	31.7	Large Bell	Pro Tip	6.9	Acetyl/Nylon
100691	23	43.2	Large Bell	Pro Tip	6.9	PP/PP
100504	32	62.2	Large Bell	Pro Tip	6.9	PP/PP
100880	39	77.0	Large Bell	Pro Tip	6.9	PP/PP
100881	48	92.5	Large Bell	Pro Tip	6.9	PP/PP

Type-C Static Mixer

Type C Mixers are available in Standard Bell and Integral Nut inlet connections. Integral Nut eliminates the need for a separate retaining nut. Options are the Bell Mixer, Spiral Barbed Extension Mixer and Integral Nut Mixer (7/8 - 9).

Element Diameter 12.8mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Retained Volume (ml)	Element / Housing
100882	12	17.02	Bell	Stepped	15	PP/PP
100883	18	23.11	Bell	Stepped	19	PP/PP
100884	24	29.72	Bell	Stepped	25	PP/PP
100885	18	35.8	Bell	Barb Ext	24	PP/PP

Element Diameter 8.5mm

100887	12	21.8	Integral Nut	Tapered	12	Acetyl/PP
--------	----	------	--------------	---------	----	-----------

Element Diameter 12.8mm

100888	18	24.4	Integral Nut	Stepped	19	Acetyl/PP
100889	18	36.5	Integral Nut	Barb Ext	24	Acetyl/PP

Element Diameter 16.00

101101	12	43.84	Integral Nut	Full Bore	58	Acetyl/PP
--------	----	-------	--------------	-----------	----	-----------

Element Diameter 20.0mm

100890	16	32.7	Bell	Full Bore	71	Acetyl/PP
100891	20	39.6	Bell	Full Bore	88	Acetyl/PP

All Type B & C Mixers can be used with: - u-TAH Universal Cartridges, 380mL Coaxial Cartridges & 200-1500mL Side x Side Cartridges.

Type-D Static Mixer (Series 190)

Featuring a standard Bayonet connection, the Type D Mixer is designed for use with 50 mL two-component cartridges. It has five diameters available with four outlet styles: Slip Luer, Full Bore, H-Tapered, and Stepped. The Slip Luer is our standard offering. The Full Bore ensures maximum flow with minimal back pressure.

For use with: 50mL Side x Side Cartridges

Element Diameter 2.36mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Retained Volume (mL)	Element / Housing
100892	12	3.8	Bayonet	Slip Luer	0.10	Acetyl/PP

Element Diameter 3.18mm

100893	12	5.3	Bayonet	H-Tapered*	0.20	Acetyl/PP
100894	24	8.6	Bayonet	H-Tapered*	0.40	Acetyl/PP

Type-D Continued

Element Diameter 4.75mm

100895	8	4.1	Bayonet	Full Bore	0.40	Acetyl/PP
100896	16	8.6	Bayonet	Slip Luer	0.90	Acetyl/PP
100897	16	8.6	Bayonet	H-Tapered*	0.90	Acetyl/PP

Element Diameter 5.40mm

100898	7	5.8	Bayonet	Slip Luer	0.90	Acetyl/PP
100899	17	11.2	Bayonet	Stepped	1.90	Acetyl/PP
100900	21	13.5	Bayonet	Stepped	2.40	Acetyl/PP

Element Diameter 6.35mm

100901	12	9.9	Bayonet	Slip Luer	1.90	Acetyl/PP
100902	16	12.2	Bayonet	Stepped	2.50	Acetyl/PP
100903	20	15.0	Bayonet	Slip Luer	3.00	Acetyl/PP
100904	20	15.0	Bayonet	Stepped	3.00	Acetyl/PP
100905	20	15.0	Bayonet	H-Tapered*	3.00	Acetyl/PP
100906	20	13.5	Bayonet	Full Bore	2.80	Acetyl/PP

*The H-Tapered outlet is offered where precise placement of the adhesive is required. To connect Luer needles or extensions, it is moulded with an interlocking connection. This requires the attachment of a Luer Lok Adapter #101002 ordered separately.

Type-E Turbo Mixer

Shorter than comparable spiral mixers, the square Turbo Mixers allow users to get closer to their application while reducing adhesive waste. The Type E 11.2 mm Turbo Mixer square geometry can provide superior mixing, allowing the operator to be closer to the application, and reducing the retained waste within the mixer. All mixers have 7/8 - 9 Integral Nut.

Element Width 11.2mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Retained Volume (mL)	Element / Housing
100914	20	19.1	Integral Nut	Short Barb	15.1	PP/PP
100915	26	22.9	Integral Nut	Short Barb	17.0	PP/PP
100916	20	25.3	Integral Nut	Special Conical Ribbed	17.9	PP/PP

The optional “hanging bracket” attaches the Type Mixer to the u-TAH Cartridge Systems. The double-looped form snaps onto the 11.2 mm nozzle’s unique ribs and over the neck of a cartridge creating a durable attachment. – #101273.

Type-E₂ High-Flow Turbo Mixer

The 14.3 mm High-Flow Turbo Mixer provides higher flow rates with less effort. The square geometry consists of a series of alternating left- and right-hand elements with intermittent flow inverters which effectively channel the fluids from the walls into the centre of the mixer. The High-Flow Turbo is designed to fit most disposable cartridges.

Element Width 14.3mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Retained Volume (mL)	Element / Housing
100918	19	38.9	Integral Nut	Short Barb	40.4	PP/PP
100917	19	38.9	Integral Nut	Short Barb	40.4	PP/PP

Types-E & E₂ Turbo Mixers can be used with u-TAH, 380mL Coaxial or 200-1500mL Cartridges

Type-E₃ Bayonet Turbo Mixers

The Type-E₃ Turbo Mixer ensures superior mixing performance and allows the operator to be closer to the workpiece. Designed for 50mL two-component cartridges, the Turbo geometry consists of a series of alternating left- and right-hand elements with intermittent flow inverters. The flow inverters effectively channel the fluids from the walls into the centre of the mixer and from the centre to the walls.

Element Width 5.15mm

Part #	# Mixing Elements	Housing Length (cm)	Housing Inlet	Housing Outlet	Retained Volume (mL)	Element / Housing
100919	20	10.2	Bayonet	Slip Luer	1.4	PP/PP
100920	20	9.2	Bayonet	Full Bore	1.4	PP/PP
100921	20	10.2	Bayonet	Luer Lok	1.4	PP/PP

Type-E₃ Bayonet Turbo Mixers are for use with 50mL Side x Side Cartridges.

Type-F OptiMixers

Using proprietary flow simulation technology to improve the material flow path design and element wedges, the OptiMixer delivers better mix quality in a 20% shorter length, without impacting other performance factors. It allows users to dispense in closer proximity to applications, providing greater control and higher job quality with 30% less retained volume. Integral nut mixers have a 7/8 - 9 thread.

101109	33	17.3	Integral Nut	Stepped	7.5	Acetyl/PP
101110	41	20.6	Integral Nut	Stepped	10.0	Acetyl/PP

Type-F OptiMixers are for use with u-TAH, 380ml Coaxial & 200-1500mL Side x Side Cartridges.

Type-G PU Foam (FFR) Mixers

Foam Froth Remover (FFR) mixers are intended for urethane foam applications. The extended tube serves two purposes: for reach and to reduce the spiralling of material after the elements to allow for a more accurate dispense.

[Element Diameter 12.70mm](#)

101117	16	60	101.60	Acetyl/Nylon

For use with Meter-Mix Valves.

Type-H Plastic Inline Mixers

The all-plastic assembly mixers are ideal for short pot life adhesives. Its low cost allows disposal of the mixer instead of purging or baking. The housing is translucent, so the operator can inspect the condition of the mixer. With the interior mixing elements moulded of Acetyl, it has the toughness and chemical resistance to be inert to common solvents. Maximum service temperature is 250°F (121°C).

Type-I Mixer Elements

The Type-I plastic spiral elements have an “apple core” cross section. Elements are injection-moulded in one operation ensuring excellent quality control and low unit cost. Benefits include long life and great flow rate, plus element flushes clean with less solvent.

Part #	# Mixing Elements	Element Diameter (mm)	Element Length (cm)	Element*
100923	12	2.36	2.95	Acetyl

*PP available in select sizes, please contact us for more information.

Type-J High Pressure Stainless Steel Mixers

Designed for high-pressure applications, Type-J Mixers are available in four diameters and with 21 to 32 elements. A series of left and right hand “edge sealed” spiral elements are microbrazed into the length of the tube and cannot be removed. Streamlined contour of the elements ensures the mixer flushes clean with less solvent. Heavy-walled tubing resists warpage during furnace cleaning (maximum furnace temperature should not exceed 1250°F /676°C) and increases the life of the mixer.

Element Diameter 2.87mm

† Pressure limit based on BAR@150°C. *Elements 316 Stainless Steel non-removable. **Housing in 304 stainless steel with plain ends.

Type-J₂ High Pressure Stainless Steel Mixers

Type-J₂ Pipe Mixers are designed for high-pressure applications and feature sturdy metal housings with Type-I disposable plastic mixing elements. The housing is made from heavy-walled stainless steel pipe that resists dents and distortions. For routine maintenance, the mixer can be pushed out and replaced.

Element Diameter 9.3mm

Type-J₃ High Pressure Stainless Steel Mixers

Rugged and reliable, the Type-J₃ Mixers are all stainless steel and feature a modular design so you can remove the elements for easy cleaning. Two or more mixers can be coupled together using a pipe connector. Streamlined contour of the elements ensures the mixer flushes clean with less solvent. Heavy-walled tubing resists warpage during furnace cleaning (maximum furnace temperature should not exceed 1250°F / 676°C) and increases the life of the mixer.

Element Diameter 6.78mm

Mixer Accessories

Manifolds

We offer a wide variety of two-component manifolds which separately port the A-Component and B-Component into the mixing nozzle. Clean-up simply involves wiping the manifold face after the nozzle has been removed. To prevent back flow or cross contamination of reactive material, inline check valves are available. Designed when you're dispensing without a meter mix valve, but directly through the mixer. We advise you contact us to discuss your requirements.

Dispensing Tips for Mixers

We offer a wide range of dispensing tips to go with our mixers and would again suggest you contact us to discuss your requirements.

Manifold Adaptors

Mixers can be connected to some pre-existing manifolds or valves using adapters. Please contact us for more information to ensure the correct selection.

Part #	Material	Inlet
101118	Carbon Steel	1/2" Female NPT
101119	Carbon Steel	11/16" Female NPT (for Venus Gun)
101120	Carbon Steel	1/4" Male NPT
101121	Carbon Steel	3/8" Male NPT
101122	Carbon Steel	1/2" Male NPT
101123	Carbon Steel	3/4" Male NPT
100525	Aluminium	7/8" – 14 Female NPT (for 2K Valves)
101124	Carbon Steel	1/2" Male NPT
101125	Carbon Steel	3/4" Male NPT
101126	Carbon Steel	1" Male NPT

Mixer Retaining Nuts

Available to hold mixing nozzles onto adapters, block manifolds, and meter mix valves. Also, used when a metal jacket is not required.

Part #	Material	Thread
101127	Aluminium	2K Standard 7/8 – 14
101128	Aluminium	Alternative 7/8 – 9
101129	Aluminium	2K Standard 7/8 – 14
101130	Aluminium	Alternative 7/8 – 9

100524	Carbon Steel	1-5/16 – 12 UNF
101133	Aluminium	1-1/4 – 12 NS
101134	Aluminium	2K Standard

Please contact us to ensure correct selection of retaining nut.

One-Piece Metal Jackets for Mixers on Meter-Mix Valves

For medium- and high-pressure systems where pressure inside the mixer is greater than 150 psi (10 bar), we recommend that a metal jacket be used over the mixing nozzle. Ideal for robotic applications where repeat positioning is required.

Part #	Material	Thread	Mixer #	Mixer Type
101135	Aluminium, Robotic	2K Standard 7/8-14	100864	Type-A
101136	Aluminium	Alternative 7/8-9	100863	Type-A

2K Cartridge Systems

u-TAH Universal

Side x Side

380mL Coaxial

We supply only high-quality cartridge systems for packaging a wide variety of two-component materials. Products include Side x Side cartridges in various sizes, the u-TAH Universal Cartridges which fit a standard caulking gun and 380mL Coaxial cartridges.

Features and Benefits: -

- Eliminates mess and waste.
- Reduces exposure to hazardous resins.
- Ensures accurate proportioning and mixing.
- Choice of open-end or closed-end outlets.
- Available in custom colours.

Cartridge Volumes, Ratios and Types

1500mL	✓				-	PP	-

u-TAH Universal Cartridge System

The u-TAH Universal Cartridge System is a breakthrough in two-component cartridge design.

The u-TAH Cartridge looks identical to standard caulking cartridges — in fact, you might not realize it is two-component until you begin to dispense your product. It is the only cartridge system that maintains accurate ratio control and fits into your existing 310ml caulking gun. This system also fits into pneumatic (rod-driven) and battery-powered caulking tools.

The standard u-TAH cartridge contains bleed vents to allow air to escape during filling. When using low viscosity material (less than 1000cps) a “non-vented” version is available. Contact us for more information.

Quality Tested for Robustness

The cartridge body is moulded of a rigid plastic that won't burst during the most demanding applications. The interior components are fully assembled, and each cartridge is air tested. This 100% factory inspected process guarantees that, after filling, the cartridge will maintain a superior shelf life and provide trouble-free applications in the field.

u-TAH Universal Cartridge Systems

Part #	Ratio	Max Volume	Material
101158	1:1	250 mL	PP
101159	1:1	250 mL	Nylon
101160	2:1	180 mL	PP
101161	10:1	280 mL	Nylon

u-TAH Cartridge Flow Restrictors

We recommend the use of our Flow Restrictor when dispensing low-viscosity fluids. Thin adhesives are often too free-flowing and can cause cross contamination, lead/lag problems and plugging.

This low-cost solution eliminates these problems by slowing the thinner components flow.

Recommended

Mixers Type: A, F, E, E₂ & C.

Pistons: Come pre-installed.

Dispenser: Standard caulking gun.

Part #	Orifice Size (mm)	Colour
101162	1.5	Translucent
101163	2.4	Black

380mL Coaxial Cartridge Systems

The 380mL coaxial cartridge has a centre tube that contains one material and an outer “doughnut” that contains a second material in a 10:1 ratio.

Features and Benefits

- Robust neck outlet prevents cracking
- Rotating valve opens and closes outlet
- Large valve bores for greater flow
- Moulded valve seals ensure long, leak-free shelf life.
- Partially used cartridges are easily re-sealed by closing valve
- Pre-inserted pistons for ease of filling through the nose.
- Cartridges are staked to retain pre-installed piston.
- Cartridges are staked to retain pre-installed piston

Part #	Ratio	Description	Material
101164	10:1	380mL coaxial cartridge assembly	Nylon
101165	10:1	Cartridge body with valve (no staking) *	Nylon

101168	10:1	Valve Wrench*	-

*Sold

Recommended

Mixers Type: A, F, E, E₂ & C.

Pistons: Come pre-installed (available to purchase without).

Dispenser: 380mL Manual dispense gun.

Separately.

Side x Side Cartridge Systems

We offer a comprehensive selection of high quality, competitively-priced Side x Side cartridges for packaging and dispensing two-component materials used in automotive, construction, industrial, medical, and dental applications.

Cartridge System Outlet Options

Select from two types of Side x Side cartridge outlets:

Open End Outlet

- Pre-assembled with traditional nose plugs and retaining nut.
- Many can be moulded in Polypropylene (PP) or Nylon.
- See specific cartridge descriptions or contact us for material options.

Hermetically-sealed Closed End Outlet

- Feature a patented “pry-off” closure.
- Moulded in one operation.
- Cost Effective to open end cartridges.

PRY-OFF CAP INSTRUCTIONS

- Insert flat head of screwdriver into slot and pry upward
- Cap can be re-inserted to seal a partially used cartridge. To avoid cross contamination, match up the circles and squares on the cap and top of cartridge body
- For 50mL cartridges, the cap can be easily snapped off with your thumb and forefinger in the same upward motion

Colour: Black

Cartridge Pistons

Air Free Pistons

Other 2K Pistons

Our patented AF™ pistons come complete with airtight and leak-proof seals that ensure safe shipment and a long shelf life. Upon insertion, the pistons quickly eliminate any air left between the material in the cartridge system and the piston.

Note: AF pistons are compatible with Side x Side cartridge sizes 50mL, 200mL, and 300mL in 1:1 ratios. Our large side AF pistons are compatible with 50mL Side x Side cartridges in ratios 2:1, 4:1, and 10:1.

Our 2K pistons also come in Solid Multi-Seal, Solid with O-ring, and Multi-Seal Pistons with a Pre-staged Centre Bleed Plug. It's important to keep in mind that the viscosity of the materials being dispensed will affect the type of piston you use. For high-viscosity materials, for example, you would select an AF piston or solid piston. For low-viscosity materials, you would select a centre bleed piston or solid bleed piston with O-ring.

[See cartridge pages for Part #'s](#)

*Can purchase with O-ring pre-installed.

**Can purchase without pistons pre-installed.

AF Air Free Pistons

The AF™ Air Free Piston does a superior job of venting all the air between the material and the piston. Its unique design does not require a shim to bleed the air, nor does it require a second step to insert a centre bleed plug. This piston bleeds air around the circumference of the black plug and uses the force of hitting the material to close itself in a single step.

The AF piston provides a more visible indication when the piston is completely closed, i.e. the black centre plug is flush with the top of the piston. Further, since the material construction of the AF Piston is a PE/PBT combo, it is compatible with most materials, simplifying inventory.

Features & Benefits

- Eliminates trapped air
- No need for shims or secondary plugging operations
- Ensures on-ratio dispensing
- Fast, fool-proof operation
- Prevents material separation

AF Air Free Pistons

Part #	Ratio	Cartridge Type
101232	1:1	50mL Side x Side
101233	1:1	200-300mL Side x Side

Atlas 2K Piston Inserter

Atlas™ 2K Piston Inserters are a fast, convenient, and cost effective way to install AF pistons in 50mL, 200mL and 300mL Side x Side Cartridges.

Features & Benefits

- Simple to set-up and operate.
- Pistons sit correctly every time.
- Compact, space saving footprint.
- Rugged, lightweight units are easily transported.
- Conversion kit available to allow 50mL to handle 200mL cartridges and visa-versa.
- The 300mL unit can also handle 200ml cartridges.
- Designed for use with AF Air Free Pistons.

Part #	Description
101234	50 mL Piston Inserter
101235	200mL Piston Inserter
101236	300mL Piston Inserter

Equalizer 2K Dispensing Tool

The pneumatically-operated Equalizer tool accurately dispenses two-component (2K) materials packaged in 50 mL 1:1, 2:1, and 4:1 ratio cartridges.

Features & Benefits

- Designed for use with Nordson EFD electro-pneumatic fluid dispensers.
- Accurate and repeatable dispensing when used with any Performus™ or Ultimus™ dispensers.
- Optional stand mount enables operators to manoeuvre the work piece with hands-free dispense.
- Able to pre-mix and down-pack 2K products into syringe barrels.
- Simple to set up and operate.
- More durable and robust design.

Part #	Description
101237	Standard configuration provides accurate 50mL 1:1 & 2:1 dispensing.
101238	Transfer kit allows down-packing of 2K materials.
101239	Conversion kit allows use with 4:1 cartridges.
101240	Kit universal stand mount 25-50mm.

2K Dispensing Guns

These 2K dispensers are compatible for use with our 2K cartridge systems and help speed up the application of 2K adhesives. The 2K dispensers work primarily with our Side x Side cartridges, in sizes 50mL to 1500mL, and our 380mL coaxial cartridge.

50mL Manual Dispenser

When using a 50mL Side x Side 1:1, 2:1, 4:1, or 10:1 ratio cartridge, we offer an ergonomic manual dispenser for trouble-free, point-of-use dispensing.

50mL Caulking Gun Conversion Kit

The versatile caulking gun conversion kit accepts most manufacturers' 50mL cartridge systems in 1:1, 2:1, 4:1, and 10:1 ratios.

Manual Dispense Guns

The manual line of 2K dispense guns offer a portable and ergonomic option for dispensing two-component materials with a 26:1 thrust ratio.

Pneumatic Dispense Guns

Our pneumatic dispense guns use up to 120 psi (8 bar) of air pressure to dispense two-component materials with easy-to-use controls that help regulate speed.

Cordless Dispense Guns

Cordless dispense guns use an 18 Volt Lithium Ion battery and include user-friendly features to dispense two-component materials with up to 431 kg (950 lb) of force.

Hand Held Cartridge Dispensers

50mL Manual Dispensers

Our manual dispenser features a versatile, compact, durable, and well-balanced design providing trouble-free, point-of-use dispensing. Custom colours and distinctive labelling are available upon request. Lightweight design accepts all ratios.

Features & Benefits

- Better Ergonomics: lighter & more compact.
- Lower cost and better delivery.
- More versatile: accepts all ratios.
- Durable: Designed to eliminate cartridge cracking.

Ratio	Part #	Description	Part #	Description
1:1	101241	Dispenser & Plunger	101246	Plunger Only
2:1	101242	Dispenser & Plunger	101247	Plunger Only
4:1	101243	Dispenser & Plunger	101248	Plunger Only
10:1	101244	Dispenser & Plunger	101249	Plunger Only
-	101245	Dispenser Only		

50mL Caulking Gun Conversion Kit

Caulking Gun Conversion Kit accepts most multi-ratio 50mL Cartridge Systems (1:1, 2:1, 4:1, and 10:1) including competitive 50mL bayonet cartridges. A different plunger is required for each.

Features & Benefits

- Versatile: Can be used with standard caulking guns.
- Practical: Great for field installations or occasional industrial use.
- Cost Effective: Ideal for sampling your adhesives.

Ratio	Part #	Description

2:1	101251	Conversion Kit
4:1	101252	Conversion Kit
10:1	101253	Conversion Kit

2K Dispensing Guns

Manual

Pneumatic

Cordless

The 2K Dispensing guns offer user-friendly features and excellent quality associated with Rockingham Systems. Lightweight and durable, these tools make applying two-component materials quicker and easier.

Select From 3 convenient options:

- **Manual** - Provides portable dispensing of 2K materials with a 26:1 thrust ratio.
- **Pneumatic** – Uses air pressure up to 8.2BAR to easily dispense thick 2K materials, also an excellent tool for crack injection applications.
- **Cordless** – Intuitive design allows operators to dispense 2K materials without the need of any wiring or cumbersome hoses, can dispense with up to 431Kg of force.

Manual Guns

Part #	Description	Side x Side Cartridge	Weight (Kg)
101254	1:1 Manual Dispenser Top Load	160mL	1.4
