

Coronavirus (Covid-19) Priority Assessment Pods

Every hospital in England is being asked to create priority assessment pods for patients with suspected coronavirus, the NHS has said.

Lasermet is the UK manufacturer of testing pods, also known as procedure and storage pods, that can be installed in a single day either inside buildings or outside in dedicated areas.

Coronavirus assessment pods

- Can be installed in a single day
- Portable and re-deployable
- Clean room capable
- Suitable for deep cleaning
- Can be climate controlled for heating or refrigeration
- Weatherproof for outside use
- Available now for installation worldwide – transported complete or as flatpack
- Can be built on site by two people
- No cranes or heavy lifting gear required

Coronavirus assessment pod

Specification

The specification of the modular cabin or pod can include a range of door sizes, windows, ventilation systems, electronic LED signage, lighting and heating. They are suitable for daily deep cleaning and are weatherproof for outdoor situations e.g. in car parks.

The pods are highly insulated and can be used for numerous purposes. They can be thermostatically controlled to keep personnel warm or they can be chilled to low temperatures efficiently for cold room storage applications.

The modular pods can be rapidly resized, rebuilt and re-commissioned in a single day. For example, if hospitals require bigger pods, Lasermet can install additional modular panels.

These covid-19 pods are designed for rapid deployment anywhere in the world.

Coronavirus Testing

These covid-19 inspection pods can be used to check for coronavirus by dedicated virus testing staff. The pods can also be used as virus isolation pods or for treatment, or for storage.

Installation

They can be installed in areas that may be difficult for conventional portable cabins to be located. Because of their modular panel build they can be built on site to virtually any size. If they need to be relocated, they can either be moved by forklift or they can be quickly dismantled, moved and rebuilt in a single day.

Lasermet has been working with the hospitals through the UK and beyond. Here are some of Lasermet's recent customers.
